PROFESSIONAL SUMMARY

Aspiring Network Engineer with a strong foundation in IT infrastructure, system troubleshooting, and network support. Experienced in diagnosing hardware, software, and connectivity issues in real-world environments. Knowledgeable in networking fundamentals, system administration, and automation, with a growing interest in network design, security, and performance optimization.

TECHNICAL SKILLS

Networking

TCP/IP, DNS, DHCP, Subnetting

LAN/WAN concepts

Network troubleshooting & diagnostics

Basic network security concepts (firewalls, access control)

Network configuration fundamentals

Systems & Infrastructure

Windows OS administration

System installation, configuration & maintenance

Hardware & software troubleshooting

Performance monitoring & system optimization

Tools & Technologies

Wireshark

Remote desktop tools

Command-line tools

Git (basic version control)

Scripting & Automation

Basic scripting (C / PowerShell / Python)

Task automation & scheduling

File system and system monitoring scripts

Database & Technical Knowledge

SQL Server

Understanding of system logs and diagnostics

PROFESSIONAL EXPERIENCE

GRADUATE TRAINEE – SOFTWARE DEVELOPMENT

Shearwater Adventures, Victoria Falls
2025 – Present

Supported system performance and troubleshooting within a production environment

Assisted in diagnosing and resolving application and system-related issues

Worked with deployed systems hosted on IIS, supporting uptime and availability

Collaborated with teams to resolve technical issues impacting system connectivity and performance

Gained exposure to system infrastructure and deployment environments

IT SUPPORT

Three Choirs Distribution

Diagnosed and resolved network, hardware, and software issues for end users

Configured and maintained computers and network-connected devices

Assisted users with connectivity issues, including LAN and internet access problems

Performed system maintenance to ensure optimal performance and minimal downtime

Supported general IT infrastructure and daily operations

PROJECTS

System Monitoring & Automation

Developed scripts to monitor system performance and trigger alerts under defined conditions

Built automated cleanup tools to manage system storage and improve efficiency

Basic Network Troubleshooting Lab

Configured a small LAN environment using routers/switches

Practiced IP addressing, subnetting, and connectivity testing

Used command-line tools to diagnose and resolve network issues

EDUCATION

National Diploma in Information Technology

Gweru Polytechnic College
Completed: December 2024

Relevant Coursework:

Networking Fundamentals

Cybersecurity

System Administration

Programming

SOFT SKILLS

Strong Problem-Solving Skills

Communication & User Support

Team Collaboration

Attention to Detail

Adaptability & Continuous Learning

LANGUAGES

Ndebele – Native

English – Fluent

Shona – Fluent
